EDUCATION

Bachelor of Computer Science
COMSATS University Islamabad (CUI), Sahiwal Campus

2018 - 2022
Final Year Project
- Final Year Project on .NET

WORK EXPERIENCE

DOT NET DEVELOPER
Raaziq International Pvt. Ltd.

04/2024 - Present   *Lahore*
Achievements/Tasks
- Develop Web API controllers and window Services
- Understands workflow and relationships and managed service providers.
- Leading design and coding of applications using routine and/or advanced technology.
- Ability to work with project cycles and manage rapid changes solid skills
- Proficiency in reports generation using Crystal Reports, RDLC, SSRS.
- Resolve complexity development cycle and team management
- Experience in querying using LINQ to SQL, LINQ to JSON and other data sources

DOT NET DEVELOPER
TOP EDGE TECHNOLOGIES

*01/2023 - 04/2024*   *Multan*
Achievements/Tasks
- Tools: Swagger, MS SQL Server 2018, Postman, Visual Studio 2022, Visual Studio Code, GitHub
- Developing applications using Microsoft technologies e.g., .NET Framework 4.7/ 4.5/ 4.0/3.5, .Net Core, Web applications using ASP.NET, MVC, Web APIs.
- Proficient in developing systems built and databases, structure, triggers, Views and Stored Procedures in SQL and optimizing the database, including requirement analysis, design, data conversion, loading and implementation.
- Expert level of knowledge on Object Oriented Programming's concepts including Inheritance, Abstraction, Encapsulation and Polymorphism, good experience in exception handling, optimization, debugging and tracing by which the whole model of application runtime can be seen and analysis.
- Creating data Access layer using ORM tools (EF, ADO .NET).

SKILLS

`C#` `.NET CORE` `RestAPI` `.NET MVC`
`Entity Framework Core` `HTML` `CSS` `IIS`
`Bootstrap` `JQuery` `AJAX` `Github & Git`
`JSON` `JavaScript` `Web API` `ADO.NET`
`Winform` `MVC Architecture` `Razor View Engine`
`Unit Testing` `SQL Server` `Repository Pattern`

PROJECTS

Web Based HRM System | .NET Core | API | SQL Server
- My role in the project is developed and implemented the backend logic of the HRM system using .NET Core API.
- Leading the development of a SAAS-based HRM system using .NET Core 6.0 with implementing repository design patterns for enhanced scalability and maintainability.
- Implemented Candidate management, Leave , Performance evaluation, Task management ,Claim management ,Event management modules and so on.
- Tools: Swagger, MS SQL Server 2018, Postman, Visual Studio 2022, Visual Studio Code, GitHub

Web Based FDO System | .NET MVC | SQL Server
- My role in the project is developed and implemented the backend logic of the FDO system using .NET MVC .
- Tools: MS SQL Server 2018, Visual Studio 2022, GitHub

Desktop Application | C# | Window Form | SQL Server
- Auto Distribution System
- Access Control System
- Tools: MS SQL Server 2018, Visual Studio 2022, GitHub
